

Magfly Universal Magnet

Item No.: EHMF TYPE

Material: Neodymium Magnets, Non-ferrous Separating Plate, Metal Fixture

Surface Treatment: Galvanized, Painting or Black Oxidation Treatment

Max Working Temperature: 80°C

Description:

Magfly Universal Magnet, also called Magnetic Clamp, is a fantastic new generation magnetic technology for positioning in casting bed with integrated Magfly feet, which widely applied into new green precast concrete construction industries. The special magnetic circle design made it be much convenient to control the magnetic force with the handle.
