

Steel Magnetic Recess Former

Item No.: EHMRF TYPE

Material: Neodymium Magnets, Metal Parts

Surface Treatment: Zinc Plated, or Color Zn coating

Max Working Temperature: 80°C

Description:

The Magnetic Recess Former metal is used for fixing round anchors in steel precast concrete panel, supported by high powerful permanence magnets. They are suitable in Capstan lifting anchors from 1.3t to 10.0t and even 20.0t or 30.0t for customers' requirements. All magnetic formers are zinc plated for corrosion resistance or made with rubber coating.
